Three Analyst for Business

What is Three Analyst?

Three Analyst is a value-added service providing a billing insights tool for Three's business Customers.

Three Analyst provides an interactive reporting tool which is designed to assist analysis of usage patterns, and to facilitate greater understanding and control over telecoms usage in Customer's business. The tool is for information purposes only and does not constitute a simulation of Three's billing invoice, or a tool to carry out in-life activities such as paying bills or setting Spend Caps.

There are 2 different versions of Three Analyst as set out below, which will be dependent upon the Three Business Plan selected by Customer, or the version of Three Analyst purchased by Customer as an Add-on:

- Three Analyst Standard
- Three Analyst Advanced

Three Analyst will be applied at billing account number level ("BAN"), so all usage of SIMs under Customer's BAN will be available on the Three Analyst tool. For the full product sheet on Three Analyst, please visit www.three.co.uk/business/three-analyst.

	<p>Add-on, or purchased as a standalone Add-on, this will be set out clearly in the Price Guide(s).</p> <p>If Customer has Three Analyst incorporated as part of the Essential Service, Enhanced Service or Complete Service Add-on, all other connections under Customer's billing account number will also get the benefit of Three Analyst, as the Three Analyst Service is applied at billing account number level.</p>
Does Three Analyst cover inbound usage and/or outbound usage?	Three Analyst will show both inbound and outbound usage, i.e., calls made / received, texts sent / received, and data used by Users.
If an employee leaves Customer's employment, who is responsible for removing that employee's access?	<p>Customer has full control over choosing the Enterprise Admin, with that Enterprise Admin having the sole authority to create additional authorised users. It follows that Customer must also remove any Users that should no longer have access.</p> <p>Three excludes all liability in this regard.</p>
If a SIM is terminated, will that SIM's data automatically be removed?	The SIM usage details will be removed for future reports upon the monthly upload of data following the Three billing cycle, but historical reports will remain available for that SIM.
Will Three Analyst trigger any usage notifications?	No, Three Analyst is an analysis tool, and not a platform to send any usage consumption notifications. These notifications will come from Three as usual.
Can Customer use Three Analyst to set spend caps or limits?	No, Three Analyst is an analysis tool only. Customer should visit their online Three Business Account to manage usage, or call the Three Business Service Team to provision any limits they require as usual.
Software updates and licence agreements	<p>Customer is expected to undertake all required software updates to ensure continued access to the Three Analyst platform.</p> <p>Customer will comply with the Terms of Use or end user licence terms relating to Three Analyst. If Customer does not accept the terms of the licence of any software required in order for the Three Service to be performed, Three will be excused from performing any Three Service relying on such software.</p>
Why is there a difference between Three Analyst and Three's bill?	<p>The reports in the Three Analyst tool are based on a high-level classification of call types and associated charges, which may not replicate the classifications or detailed billing rules applied by Three. Three Analyst is intended to provide a summary of Customer's bill only.</p> <p>Three's billing invoice remains the single statement of account, and upon which any Charges due should be payable.</p>
If Customer already has Three Analyst Standard as part of the Essential Service, how can they upgrade to Three Analyst Advanced?	Customer should contact the Three Business Service Team to discuss an upgrade Three Analyst Advanced. This change will attract additional Charges.
When will data be available?	<p>If Customer is new to Three, Three Analyst will not contain any usage data until after Customer's first bill cycle.</p> <p>If Customer is an existing Customer, data should start to be uploaded following initial provisioning of the Three Analyst Service. The full data will not be available until after each bill cycle. Three offers no guarantee or timeframes in this regard.</p>
